Professional Summary

Experienced Senior Python Developer with 5+ years delivering scalable, high-performance backend solutions and cloud-native platforms. Proven expertise in Python (Django, FastAPI), cloud technologies (AWS, Azure), microservices, and modern data engineering pipelines using Kafka and Flink. Demonstrated success leading teams in Agile environments, mentoring junior developers, and integrating complex APIs and databases. Passionate about optimizing performance and contributing to innovative digital product delivery.

Core Competencies

- Python (Django, FastAPI, Flask)
- Distributed Data Processing (Apache Kafka, Apache Flink)
- Cloud Platforms: AWS, Azure, GCP
- Microservices and Serverless Architectures (Lambda, Functions)
- SQL & NoSQL Databases: PostgreSQL, MySQL, MongoDB, DynamoDB
- Docker, Kubernetes, Nginx, Gunicorn, Uvicorn, Supervisor
- API Design & Integration, ORM (SQLAlchemy, Django ORM)
- Event-driven and Scalable Application Design
- DevOps: CI/CD (Jenkins, GitLab CI), Git & GitHub
- Unit Testing: pytest, unittest; debugging & code optimization
- Frontend with React, HTML, CSS, JavaScript
- Team Leadership, Client Communication, Agile/Scrum

Professional Experience

Senior Python Developer

Sufalam Technologies Pvt Ltd — Ahmedabad, Gujarat
Dec 2023 – Present (2+ years)

- Collaborate on the architecture and backend development for SADAD Pay, a multi-tenant payment application for the Qatar market, using Python and FastAPI.
- Implement distributed data processing solutions, integrating Apache Kafka and Flink to optimize real-time transaction throughput and reliability.
- Design and maintain robust APIs, manage third-party integrations, and optimize database schemas on PostgreSQL.
- Lead the integration of frontend with backend logic, collaborating with React developers for seamless user experiences.
- Ensure high availability, security, and scalability using AWS services and Docker-based deployments.
- Mentor junior team members, enforcing code quality and best practices through code reviews and test-driven development.

Senior Project Associate

INFLIBNET (Information and Library Network Centre, UGC) — Ahmedabad, Gujarat
Dec 2021 – Nov 2023

- Developed automated tools in Python for scalable data extraction, validation, and ingestion from public APIs.
- Implemented microservices indexed with Solr and MongoDB to enhance academic publication discovery systems.
- Created data validation and bulk operations pipelines to support high-quality, reliable data delivery.
- Conducted regular testing, performance tuning, and provided documentation/training for internal teams.

Software Engineer

Visudh Ajivam — Ahmedabad, Gujarat
May 2021 – Nov 2021

- Designed home-appointment scheduling and diagnosis platform in Python and Android.
- Built APIs and backend logic for appointment management and notifications.
- Maintained scalable cloud integrations for operational reliability.

Software Engineer

Tadvid Info Technologies — Ahmedabad, Gujarat
Oct 2020 – May 2021

- Developed an agricultural yield analytics dashboard using Python, AngularJS, and PostgreSQL, leveraging cloud-hosted geospatial data.
- Engineered raster-to-vector data processing plugins and improved data pipelines for performance.

Key Projects

SADAD Pay (Sufalam Technologies)

- Cloud-native, multi-tenant payment application for Qatar, processing thousands of transactions daily.
- Leveraged FastAPI, Docker, PostgreSQL, microservices, and Kafka/Flink streaming for speed and reliability.

Data Processing Pipelines (INFLIBNET)

- Built automated scraping, validation, and ingestion toolchain with Python, MongoDB, Solr for academic datasets.
- Improved accuracy and processing speed for large-scale bibliographic data flows.

Machine Marathon (Academic Project)

- Developed a unified ML experimentation system with scikit-learn models, increasing research productivity by 60%.

Education

B.Tech, Computer Science and Engineering
SAL Institute of Technology and Engineering Research, Gujarat
Sep 2017 – Jun 2021
CGPA: 8.02/10

Technical Certifications

- AWS Fundamentals : Core Infrastructure (Coursera, 2023)
- Python for Everybody (Coursera, 2022)
